6. Recommendations List

Meal Recommendation Wizard		
Meal Name	Add Meal	Add Missing Ingredients
Cake	<div>Add Meal</div>	<div>Add Missing Ingredients</div>
Pie Cheery	<div>Add Meal</div>	<div>Add Missing Ingredients</div>

Flow:

1. Default : Homepage
2. Homepage — Click Register —> Registration Page
3. Homepage — Click Login —> Login Page
4. Registration Page — Click Register —> Login Page
5. Login Page — Click Login —> Products List Page
6. Products List Page : gets updated when items are added to the cart
7. Products List Page — Click Go to my cart —> Cart Page
8. Cart Page: get updated when products quantity is increased/decreased (Just dummy changes in view, It doesn't change the database)
9. Cart page : Checkout , Total amount are dummy buttons, Nothing happens when clicked.
10. Cart Page — Click on Recommendation List —> Recommendation List Page
11. Recommendation List Page : Add Meal button is dummy, nothing happens when clicked
12. Recommendation List Page — Click Add missing ingredients —> Loads Product List page but only displays products in the recipe but not present in the cart

Updated Flow:

1. Default : Homepage
2. Homepage — Click Register —> Registration Page
3. Homepage — Click Login —> Login Page
4. Registration Page — Click Register —> [Personal Info Form Page](#)
5. [Personal Info Form Page](#) : Same fields as Microsoft form that we circulated, Done button , Skip Button
6. [Personal Info Form Page](#) — Click Done —> Login Page (Save form info in DB before redirecting)
7. [Personal Info Form Page](#) — Click Skip —> Login Page
8. Login Page — Click Login —> Products List Page
9. Products List Page : gets updated when items are added to the cart
10. [Products List Page](#) : Add search button to search products.
11. [OPTION1](#): Same Page is divided in two parts (Products List and Recommendation List pages merged in one page) :
 1. [PART 1](#): Products List Part with Search bar for products
 2. [PART 2](#): Recommendations list part where content changes dynamically with recommendations as products are added to the cart
 1. In Recommendation list part: Give multiple tabs for different kind of recommendations like
 2. Tab1 : Recipe recommendations with “Add Missing Ingredients” button
 3. Tab2 : Similar ingredient recommendations with “Add Ingredient” button
 4. Tab3 : Complimentary ingredient recommendations with “Add Ingredient” button
 5. Recommendation List gets updated and shows “added to the cart” status [when any of the recommendations are added in above tabs 2, 3](#)
 6. For tab 1 i.e. Recipe Recommendations: Product List part gets updated with list of missing ingredients instead of all ingredients.
 7. [No need of “Add Recipe” button as previous design](#)
 3. Go to Cart Button
 4. Products List Page — Click Go to my cart —> Cart Page
 5. Cart Page : Same as previous design, [Remove “Recommendation List” button](#)
12. [OPTION2](#): Keep Products List page as it is and make changes in Recommendation List page
 1. Products List Page : gets updated when items are added to the cart
 2. Products List Page — Click Go to my cart —> Cart Page
 3. Cart Page : Same as previous design
 4. [Recommendation List Page](#):
 1. [Three tabs as mentioned in OPTION1 design to display different type of recommendations and corresponding buttons.](#)
 2. [Tab1](#) : Recipe recommendations list with “Add Missing Ingredients” button,
 3. Recipe — Click Add missing ingredients —> Product List page with missing ingredient list

4. Tab2 : Similar ingredient recommendations with “Add Ingredient” button, List updated with status “Added to cart”, No redirection
5. Tab3 : Similar ingredient recommendations with “Add Ingredient” button, List updated with status “Added to cart”, No redirection
6. Go to Cart Button
